

## Vitamins for Maximum Health and Nutrition

Many patients know that we advocate good nutrition – which means healthy supplementation – as part of a balanced program leading to optimum dental, and overall, health.

Our favorite nutritional products are produced by Standard Process® and NutriWest®. These are “whole food” vitamins derived from organic products and have a long and proven history of clinical success.

But . . . they are only available directly through the dental office.

We realize that some patients may not always be able to stop by for these supplements outside of their visits so we are making the Veriuni line of supplements available for your convenient on-line ordering. Just click on the bold heading below to learn more and to get ordering information:
